MEASURE GUIDE FOR CABINETS

1. Draw the basic wall formation of the space cabinets are to be placed.
2. Measure floor to ceiling height in 2-3 locations. Note the shortest distance. (A)
3. Measure all walls corner to corner. (B)
4. Measure and locate on drawing all windows, doors, obstacles and openings. Include the trim in the measurement. Be sure to measure and note the dimension to the left and right of the opening. (C)
5. Measure to and indicate the location of water lines for sink and gas or electric for stove. (D)
6. Provide width and height of refrigerator. If using specialty/nonstandard appliances, please provide sizes. (E)

7. If your final drawings are in a digital format, they may be attached to the email when the Design Form is submitted or can be directly emailed to cabinetdesign@midwestfloors.com. If the drawings are not in a digital format, they can be faxed to Midwest Cabinet Design at **801-990-6580**.
