Resilient Commercial Flooring

A coordinated and innovative system of rubber, vinyl, LVT, composition tile and linoleum. All linked together in performance and aesthetic to create high performance environments and to deliver measurable return on investment in a sustainable way.

Rubber

Rubber flooring has it all. Universally embraced for its practical beauty and a rare balance of function with aesthetics, safety with efficiency, and short term costs with lifetime return. Rubber is naturally slip resistant and shock absorbent. Easy to maintain and durable enough to perform for decades, rubber is available in a rich array of colors, patterns and textures.

Linoleum

One of the most natural and sustainable flooring solutions on the market, Tarkett linoleum has been appreciated for its natural beauty, comfort and durability for over 150 years. Following the original 1898 recipe, our linoleum is made from 94% natural raw materials and is treated with our unique xf²surface protection for extreme durability, easy cleaning and cost-effective maintenance. Tarkett linoleum is the world's first to be certified Cradle to Cradle.

Luxury Vinyl Planks and Tiles (LVT)

Luxury vinyl planks and tiles offer complete design freedom with endless layout possibilities across a broad range of patterns, colorways, quality levels and installation formats. Modular in design and durable in construction, luxury vinyl flooring withstands heavy traffic and is easy to maintain with extra resistance to scuffs, scratches and stains. For any segment, for any space, luxury planks and tiles is an optimized, inspired solution.

Vinyl Sheet

Vinyl flooring is a versatile solution that combines a broad portfolio of patterns and colorways with high performance for schools, hospitals and other high traffic areas. From heterogeneous sheet composed of several layers, including a printed sheet for limitless design possibilities, to homogeneous sheet and tile with single layer, through pattern, Tarkett's portfolio is high performing and low emitting, contributing to a safe and healthy indoor environment.

Sports & Multi-Function Flooring

Many commercial spaces have to support and withstand abuse from a multitude of activities. Today, multi-functionality rules. The locker room may be connected to the weight room which is down the hall from the gym which can also be the cafeteria. Our multi-function flooring solutions are designed to work under all kinds of activities. Our rubber and vinyl solutions come in an array of colors, patterns, textures and thicknesses. Some can install without adhesives, locked together like a jigsaw puzzle.

Specialty Applications

There are often special spaces within a commercial environment that need unique flooring solutions to optimize performance. The spaces have special challenges. Acoustics. Enhanced slip resistance. Resistance to oil and grease. Electrical resistance and static dissipation. Safe egress. Tarkett's portfolio of specialty flooring will meet the unique demands of each and every space.

Accessories

Wall Base

That special area between the wall and the floor that brings the whole space together. Our portfolio of options is greater than ever before; more profiles, more colors and more finishes to be a shout-out to your interior space or to simply add a whisper. These wall bases are designed to perform as well, adding safety with photoluminescence in egress routing, reducing install schedules with TightLock or adding the rich look of wood with Millwork while reducing high installation and maintenance costs.

Stairwell Management

Proper stairwell management helps minimize risk by balancing safety and performance, leading to a measurable long-term return. Our integrated stairwell management system includes rubber and vinyl treads, nosings and accessories that enhance the flow of a space, allowing people to move safely and comfortably through the ups and downs of their day. All are available in a broad array of profiles, textures, patterns and colors

Finishing Accessories

In high-performance environments, the whole space is greater than the sum of its parts. Every element works together to create synergy. The result is that people perform better in the space. Interior designs must meet the recommendations of the Americans with Disabilities Act (ADA). To help, we offer an entire family of finishing accessories that will comply with regulations while complementing the existing finish elements. Now it's possible to transition from one floor thickness to another with few slips and stumbles, and ensure that every detail is considered.

Tarkett's Story

From its humble, entrepreneurial beginnings in 1880, to becoming today's #1 global manufacturer of resilient floorcoverings, Tarkett has never wavered in its commitment to providing innovative, sustainable solutions for the built environment. We've brought together some of the world's most prestigious brands to create the industry's most comprehensive portfolio—including soft and resilient surfaces, and the accessories that pull them all together. Whatever your flooring design or installation challenges, Tarkett has you covered.
